ENTERPRISE PROFILES

Hangzhou Nuzhuo Technology Group Co., Ltd. is located on the bank of the beautiful Fuchun River, the hometown of Sun Quan, the Great Emperor of Soochow. It is located in the Tonglu Jiangnan New District on the outskirts of Hangzhou, between the West Lake of Hangzhou and the national scenic spot Qiandao Lake and Yaolin Wonderland, Hangzhou xinjing Expressway The Fengchuan exit is only 1.5 kilometers away from the company, and the transportation is very convenient.

Hangzhou Nuzhuo Technology Group Co., Ltd. has three subsidiaries: Hangzhou Kaihe Air Separation Equipment Co., Ltd., Hangzhou Azber Technology Co., Ltd., and Guodi Technology (Hangzhou) Co., Ltd.. The group company is specialized in the design and manufacture of cryogenic air separation units, VPSA oxygen generator, compressed air purification equipment, PSA nitrogen generator, PSA oxygen generator, oil-free gas booster, electric and pneumatic intelligent control valves, Temperature Control valve, Shut-off valve manufacturer. The product structure is matched up and down, one-stop service. The company has more than 14, 000 square meters of modern standard workshops and advanced product testing devices. The company always adheres to the business philosophy of "integrity, cooperation, and win-win", takes the development path of technology, diversification, scale, and develops toward high-tech industrialization. The company has passed the ISO9001 quality system certification and won the "contract-honoring and trustworthy Unit" and the company are listed as the key enterprise of technological innovation in Zhejiang Province's high-tech industry.

The company's products use compressed air as raw material, with automated process procedures to purify, separate and extract compressed air. The company has seven series of compressed air purification equipment, PSA pressure swing adsorption air separation equipment, nitrogen and oxygen purification equipment, VPSA oxygen production equipment, oil-free compressors, cryogenic air separation equipment and automated valves, with a total of more than 800 specifications and models.

The company's products use "Nuzhuo" as the registered trademark and are widely used in metallurgy and coal, power electronics, petrochemical, biomedicine, tire rubber, textile and chemical fiber, food preservation and other industries. The products play a role in many key national projects.

The company takes the needs of users as the appeal point, the development of the society as the goal, and the satisfaction of users as the standard. The company's tenet is: "Survive by quality, market-oriented, technology for development, management to create benefits, and service to gain credibility". Strive to be in line with international standards in terms of quality, service, management, and technology. With "Nuzhuo" products, provide users with clean, high-purity gas energy and create benefits, and jointly create a better tomorrow.

ENTERPRISE CULTURE

ENTERPRISE GOAL

- ◆ Aim at building a global independent brand, and pushing cryogenic air separation and control valves to the international market
- ◆ Grow a foreign trade team talents to enter the international market, as well as outstanding leaders
- ◆ Research and develop high-performance mechanical products with higher technical content, environmental protection, safety, energy saving, efficiency increase
- ◆ Independent research and development, independent creation and independent production by the key investment technical engineer department
- ◆ Overall plan, rationally rectify the production line of the workshop, realize efficient production and quality assurance

ENTERPRISE PRINCIPLE

Based on what are customers desire, technology research and development as the core, integrity management, customer willingness as the foundation, and the principle of achieving a win-win situation for both parties and long-term cooperation
